

I am now writing in the hall meeting for electing the president of the hall. Mary Bell and Mary York are up. It is still pouring and it does seem perfectly terribly wet. I find I have made a mistake in taking courses for which I have to go way over to the laboratories. t is terribly far. I got a letter from (?) this morning saying she was writing to you herself about Ernest Humpstone. The pillow was just half around for each dimension. I think it is right but I will measure again. R.M.A.
