

November 18, 1921

Dear Mother, Father, and Pete:

There is not much news today.

I had a written in Zo which I don't think I came very far from flunking.

I have a good week-end of work ahead of me.

Apollo of the chem department announced his engagement to Miss Johnson, of the Chem department--Radcliffe '20. Romances of the chem lab!

I saw Carolyn Brayton's mother yesterday. She surely is wonderful looking.

Junior Party dress rehearsal is tonight. It is going to be a very good party, i think. The party is tomorrow night.

Eleanor Wolfe asked me to go off for dinner with her tonight. She is very formal about "paying me back".

I wish I had some news for you, but I feel unusually dull. It is hot enough to be a June day.

I am going to take a walk now and then work till dinner-time.

Love,

Fannie

I may land at Wellesley yet for vacation. This train mixup makes me mad. I could take the mid-night from New York and go to theater with some of the Boston delegation, and take a noon train, or thereabouts, on Sunday. I wish the Boston trains went to Atlantic City.
