

GEORGE STUART FULLERTON

1859 - 1925

The Faculty of Vassar College wishes to express its sense of irreparable loss in the death of Professor George Stuart Fullerton. Professor Fullerton, as one of the most eminent metaphysicians of his time, conferred great distinction upon the college and its department of philosophy by his connection with our faculty. It was a rare privilege for the students of Vassar College to feel his influence as a teacher, which has so deeply affected many American philosophers of the younger generation; and for his colleagues to enjoy the stimulus of his many-sided personality and the inspiration of his beautiful character. We shall always hold him in admiring and affectionate remembrance.
